

LABORATOIRE

FRANCODEX

Laboratoire Francodex, **Animal Health Specialist** since 1985, is part of the ZOLUX family-run group based in Charente-Maritime, **in France**.

Our goals:

Our goal is to offer effective and reliable animal health and hygiene products, designed to meet your pet's every need, and ensure their optimum well-being.

Commitments for the future:

Laboratoire Francodex has adopted an eco-design approach in its product development with the aim of reducing its ecological footprint.

CHICKEN COOPS

COMPLEMENTARY FOOD

Hens are omnivores. Hence, in addition to grain, they also **need animal protein and greens. Vitamin and mineral supplements are sometimes necessary.** Eggs are safe to eat throughout use of the products.

ANIMAL HYGIENE

Parasite infestation (insects, red mites, or worms) may result in lower egg yield or cause a hen to stop laying completely, along with loss of condition and sometimes even death (serious red mite infestation). Laboratoire Francodex **offers chemical-free solutions**, to be distributed in food or applied to the animal (insect repellent powder), to help protect your hens from parasites.

Laboratoire FRANCODEX is an official partner of the Lyon Student Community Veterinary Clinic, in France!

This charity works to promote values shared by our brand, such as **solidarity**, **respect for the needs of animals**, and **access to care** for all domestic animals. **Laboratoire FRANCODEX** is committed to this incredible social and medical venture!

The Student Community Veterinary Clinic (Dispensaire Vétérinaire Étudiant) is a charity governed by French Law 1901, created in 2008 and **completely run by veterinary students in Lyon.**

It aims to promote free or affordable care for pets belonging to individuals living in extreme poverty.

These Lyon-based veterinary students work directly with partner hostels, with visiting social workers, to raise awareness and offer training in pet care, but also to provide free veterinary care, for pets belong to individuals living in extreme poverty.

OUR COMMITMENT

Laboratoire FRANCODEX has always given paramount importance to animal health, particularly in terms of access to care for all domestic animals.

This is why we have decided to make an official commitment by supporting the Student Community Veterinary Clinic, by:

- Regularly donating pet care and hygiene products allowing veterinary students to provide health care free of charge for facilities agreeing to support pet owners, by organising veterinary care for those living in poverty.
- **Educating and raising awareness among the general public** through our communication channels to help change the way homeless people living in poverty and their pets are perceived.
