Laboratoire FRANCODEX is an official partner of the Lyon Student Community Veterinary Clinic, in France!

This charity works to promote values shared by our brand, such as **solidarity**, **respect for the needs of animals**, and **access to care** for all domestic animals. **Laboratoire FRANCODEX** is committed to this incredible social and medical venture!

The Student Community Veterinary Clinic (Dispensaire Vétérinaire Étudiant) is a charity governed by French Law 1901, created in 2008 and **completely run by veterinary students in Lyon.**

It aims to promote free or affordable care for pets belonging to individuals living in extreme poverty.

These Lyon-based veterinary students work directly with partner hostels, with visiting social workers, to raise awareness and offer training in pet care, but also to provide free veterinary care, for pets belong to individuals living in extreme poverty.

OUR COMMITMENT

Laboratoire FRANCODEX has always given paramount importance to animal health, particularly in terms of access to care for all domestic animals.

This is why we have decided to make an official commitment by supporting the Student Community Veterinary Clinic, by:

- Regularly donating pet care and hygiene products allowing veterinary students to provide health care free of charge for facilities agreeing to support pet owners, by organising veterinary care for those living in poverty.
- **Educating and raising awareness among the general public** through our communication channels to help change the way homeless people living in poverty and their pets are perceived.
